Guidelines on Annual Numbering Return

Introduction

The Posts and Telecommunications Department ('PTD') is responsible for the overall management of the Numbering Plan of the Republic of the Union of Myanmar. In order to undertake this task, PTD requires all holders of numbering allocations to submit an Annual Numbering Return, which in turn will be used by PTD to maintain and update the Numbering Plan. This document provides guidelines on the preparation and submission of the Annual Numbering Return to PTD.

Annual Numbering Return

As stated in Condition 16(b) of the Numbering Rules, each holder of a numbering allocation shall submit an Annual Numbering Return as part of the numbering audit process. The Annual Numbering Return shall refer to information at the end of the calendar year, on the use of each numbering allocation, the numbers that have been allocated to end users, and the forecasted demand within each allocation.

In particular, the following information shall be provided in the Annual Numbering Return for each numbering allocation (for the avoidance of doubt, a numbering allocation refers to the allocation of a single category of numbering resource at any one time):

1. The current use of the allocation
2. The numbers in service allocated to end users (utilization)
3. Details of numbers set aside for planned growth, customer orders, or other usage, with explanations
4. Blocks of numbers allocated to any person for purposes other than to end users

In addition, each Annual Numbering Return shall also provide:

1. A three-year forecast of demand for geographic (fixed) and mobile numbers
2. The justification of continuing reservation by the operator of numbering capacity
3. Any other information requested by PTD

The categories of numbering resources which need to be included in the Annual Numbering Return are as follows:

1. Geographic (fixed) numbers
2. Mobile numbers
3. Special access numbers, short codes and short numbers
4. International signaling point codes
5. National signaling point codes

Guidelines on Annual Numbering Return

Format of the Annual Numbering Return

Operators are requested to provide this information using the templates included with this document, for each category of numbering resource allocated.

Deadline for submission

Operators are expected to submit the Annual Numbering Return within forty-five (45) days of the end of the calendar year. PTD also reserves the right to request operators to submit the Annual Numbering Return at any time, which operators will need to submit within forty-five (45) days.
